16. Relations with Customers and Suppliers

Getting to know its customers and markets by monitoring and acting proactively on them and pioneering change are among the crucial factors behind the innovative business style of Migros. For this reason, a number of "firsts" such as consumer rights took hold in the retail industry only after they were introduced by Migros as early as in the 1960s and 1970s. By introducing the Migros Club system for the first time in Turkey, in 1998, Migros had an opportunity to become better acquainted with its customers and provide them with differentiated service. And through this system, the Company gained the opportunity to approach its customers not only collectively but also individually by conducting customer data analyses. Migros aims to fulfill the expectations of its customers as satisfactorily as possible through the stores it operates in different formats.

In the retail industry where any product seen in any store can be imitated quickly, Migros' experience and deep-rooted innovation embedded in its corporate culture, as well as investments in supporting technology, together create a competitive advantage that cannot be easily replicated.

In the 1990s, Migros became the first retail company to introduce the barcode system and electronic cash registers which reduced waiting times at the checkout counters and decreased the Company's operating costs dramatically. And today, the same pioneering spirit led the Company to set up a B2B system for its suppliers leading to mutual benefit both on the logistics side and the cost side. This system benefits all the stakeholders, and especially the Company's customers.

Migros has conducted a Customer Satisfaction Survey regularly since 1994. In 2010 survey, 9,550 of our customers who shop at our stores were asked about their opinion. The analyses undertaken on the survey results help us to have an idea about the current and future expectations of our customers. Occasional surveys conducted at kiosks inside the stores on specific matters provide the Company with the chance to hear the customers and their expectations.

Customer Relationship Management (CRM) analysis of Migros Club data and the mystery shopper surveys which are aimed at improving the service levels are quality-based performance tools specific to Migros.

Some of the other activities undertaken to achieve customer satisfaction include:

- Migros was awarded ISO 9001-2000 Quality Management System certification in August 2005.
- Migros was awarded TS EN ISO 22000 Food Safety Management System certification by the Turkish Standards Institution (TSI) in December 2006. This certification covers retail, wholesale and online sales services as well as design and provision of organizational and logistic support services. In addition, Tansaş and Macrocenter stores were brought within the scope of TS EN ISO 9001-2000 certification which were awarded to the Company previously. Migros brought Şok discount stores within the scope of both ISO 9001 and ISO 22000 certification in 2007. This signifies the introduction of discount stores to quality by Migros.
- Migros selects each of its suppliers after conducting appropriate due diligence. Suppliers are audited at regular intervals by reputable independent organizations and products are subjected to periodic quality audits. Migros-label products are also included in the same quality control process.
- Every new product, which is offered for sale at Migros stores goes through a preliminary quality control process.
- Before the products are admitted to warehouses, "food engineers" subject them to sensory, chemical, physical and microbiological quality control tests. Those products which do not meet the quality standards are rejected.
- Meat products at the stores, warehouses and on the shelves are regularly checked by veterinarians to ensure food safety.
- Personnel employed at all the stores attend training programs on hygiene in order to ensure food safety.
- In the promotional program of the company we call "Aksiyon", products are offered for sale at discount prices for a period of 15 days with the guarantee that there will be sufficient stock for the duration of the sale.
- All customer suggestions received at the stores or the Call Center are evaluated and the results are communicated to customers as soon as possible. Customers can forward their complaints quickly and easily to company store managers via a toll-free customer line and by e-mail which can be sent to managers at all levels.
- In keeping with its objective of exceeding customer expectations and making life easier through innovations, Migros introduced the first self-check-out solution "Jet kasa" to its customers in Turkey. "Jet kasa" eliminates the need to wait in line and allows customers to check-out by themselves in three easy steps. As the number of customers using 'Jet kasa' increases by the day, so does the number of stores featuring this facility.

Efforts to ensure full customer satisfaction are presented in the relevant section of the Annual Report.
